

Vietnam Under French Rule: 1919-1946

A New E-Book Collection from Cambridge Archive Editions

Born out of the maelstrom of World War II, the country today known as Vietnam soon became a virtual synonym for conflict.

In partnership with Cambridge University Press, East View announces the first in a new series: *Vietnam under French Rule, 1919-1946: The Nationalist Challenge and the Japanese Threat*, following Vietnam's struggle for freedom from French Colonial rule and the occupation by the Japanese during World War II.

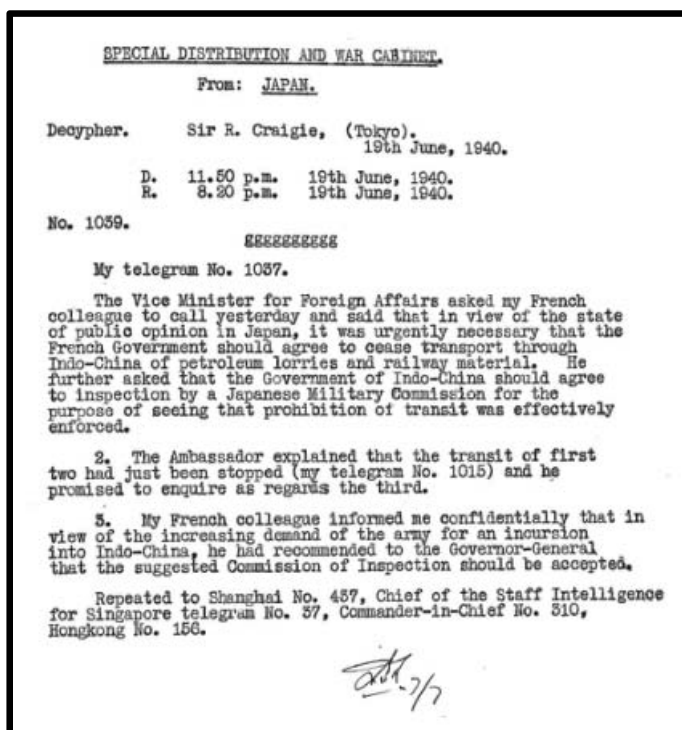

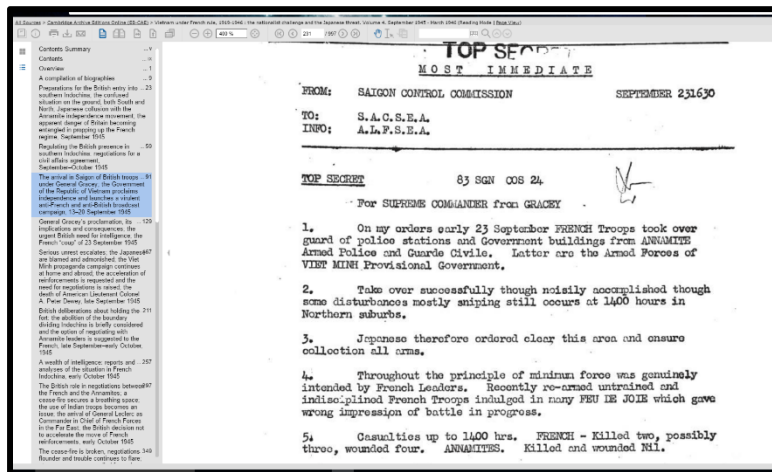

With 3,500 pages of primary source reports, dispatches, and memoranda drawn from the British Foreign, Colonial, Dominions, and War Offices — supplemented by material from offices of the Prime Minister and the Cabinet — *Vietnam Under French Rule* offers online access to a unique research opportunity using British Government documents to explore the struggle for nationhood under French Colonial rule.

Examples of content include:

- In Volume 1, an individual, later known as Ho Chi Minh, appealed to Britain to recognize Annamite claims made at the Paris Peace Conference in 1919. This appeal was dismissed by Foreign Office officials as insignificant and unworthy of reply.
- In Volume 4, the British government and British troops stationed in the southern half of a divided Indochina oversaw the evacuation of Japanese troops and facilitated the re-entry of the French in the early months of 1946.

The collection has been carefully curated, with each document individually described and chronologically arranged under thematic sections, making it very easy to research the historical developments of this region.
